

**Captured Codes:
Fine Art and Poetry
from Bitmap City Vol. 2**

by CRFTD

Where Fine Art and Code Collide

A lens captures what eyes can't hold,
A fleeting moment, a story told.
A brushstroke meets a line of code,
The master's craft, the miner's node.

Fine art ascends, its canvas vast,
Through digital frameworks built to last.
Here lies the peak of human hand,
Woven with algorithms, precision planned.

The old world bows, yet stands its ground,
As tech unveils a truth profound:
Beauty blooms where realms converge,
In Bitmap City's CRFTD merge.

The Foundation: Aerial Altitudes

Above the earth, we soar and frame,
From fields to cities, none the same.

A Canon's eye, at ten-thousand feet,
Captures life, the rhythm complete.

A lens that sees the world anew,
Forms the base where dreams construe.

The tangible blends with lines of code,
In this shared space, a blended ode.

Bitmap Blocks: Immutable Grids

Geometry carved in Bitcoin's core,
A digital legacy, an open door.

Blocks of history, formation vast,
Merge with landscapes that hold the past.

Immutable cities on farmland rest,
Each pair chosen, hand-assessed.

In this fusion of worlds, a vision grows,
A bridge between what's seen and knows.

The Pantone Thread

A palette born of culture's tide,
Each year, a color that won't subside.

From Bitcoin's birth to today's refrain,
A timeline painted, forever retained.

Pantone whispers, "Remember this hue,"
Of moments past, yet strikingly new.

In Bitmap City, they weave and bind,
A spectrum of years, a digital mind.

Web3 Slang on the Skyline

"GM" etched in a neon sprawl,
"WAGMI" shines on a skyscraper wall.

Language born in blockchain space,
Embedded in art, it finds its place.

Words of now, ephemeral and bright,
Adorning the city with digital light.

A playful wink, a cultural trace,
UNAT Ready, we embrace.

A Blended Space

From ground to block, from hue to phrase,
Bitmap City stands in blended haze.

Digital and physical, human and code,
A dual space, a unified mode.

Through DMT's lens, the vision is clear,
Art transcends, year ere year.

In layers of data and timeless grain,
Bitmap City achieves eternal refrain.
